Dear Kris,

The Friends of the Medfield Library was thrilled to hear that you want to bring a sustainable rain garden to the Medfield Community. We think that this is a great opportunity to educate our residents about the importance of native plants, the impact of climate change, and the very important concept of sustainability. The location that you have chosen next to the library and in town center is great as so many of us will get to enjoy the garden and see the changes over the seasons.

We are committing \$3500 towards this project contingent upon your securing additional funding. We are in full support of the rain garden project and think it will be a great asset to the community.

Sincerely,

Carol Wasserman
